

# Trump Administration Legal Developments

## Examining the Impact of the 2016 U.S. Election

The election of Donald J. Trump as the 45th President of the United States, coupled with Republican control of both chambers of Congress, will likely result in significant developments in U.S. financial markets and the laws that govern them. While the most sweeping changes will require legislation, The Trump Administration will also have numerous non-legislative means to reform and reshape financial and economic regulation broadly and within specific industries.

Through our program of memos, webinars, and other thought leadership and analysis, our multi-disciplinary team of experienced attorneys will provide clients with vital insight and practical guidance.

**Visit our Trump Administration Legal Developments webpage to find more information about our program and to download materials.**
